

## **High Winds**

High winds sometimes cause an unusual increase in police dispatch to alarm sites. These types of false activations are not eligible for a waiver of fees. Please assure that all doors and windows have no movement in them (*especially garage doors*). All doors and windows should be flush when close. Also check to make sure that the security system is not set so sensitive where it will react to high winds.

Precautions such as mentioned previously regarding helpful hints would help you avoid having to pay unnecessary fines for false alarm activations.
