

Environmental Quality Presentations

Lafayette Consolidated Government Environmental Quality Division has Environmental Educators available to you to present information on recycling, litter abatement and storm water pollution prevention to your school, class, group or organization including scout groups and adult civic organizations.

Presentations include:

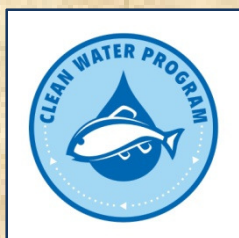

Recycling

- Beginning of recycling in the United States and Lafayette
- Information on products that are recycled in Lafayette Parish
- Environmental impact of recycling
- Reasons why every household should recycle
- Monetary impact of recycling

Litter

- Sources of litter
- Types of litter
- Environmental impact of litter
- Alternative ideas to help stop litter
- Opportunities to help keep Lafayette Clean

Water Quality

- What is a watershed?
- Which watershed do we live in?
- EnviroScape Watershed Model
- Environmental impact of surface water pollution
- Surface water vs. drinking water
- Types of surface water pollution
- Prevention and restoration methods

- Compost Facility
 - How compost is made from leaves and grass clippings
 - Overall composting process
- Closed N. Dugas Landfill
 - Anatomy of a landfill
 - Restoration of native Cajun prairie plants
 - Wildlife habitat
- Recycling Foundation
 - See how your recyclables are processed

Take a tour!
