

COMMUNICATIONS NETWORK SPECIALIST II

PURPOSE AND NATURE OF WORK

Position is responsible for designing, implementing, troubleshooting, and maintaining fiber networks and services. The Network Specialist II differs from the Network Specialist III in that the latter is responsible for data/video system product development, network security systems and protocols, VoIP headend management, and supervisory adjacent responsibilities. Incumbents work under the general direction of the Communications Network Services Supervisor and have no supervisory responsibilities.

ILLUSTRATIVE EXAMPLES OF WORK (Note: These examples are intended only to illustrate the various types of work performed by incumbents in this class. All of the duties performed by any one incumbent may not be listed, nor does any incumbent necessarily perform all of these duties.)

The Communications Network Specialist II may be required to perform all duties of the Communications Network Specialist I plus:

- Provide escalation support for all Backbone network elements
