

FLOOD INSURANCE RATE MAP DETERMINATION

Date: 12/9/2020

123 Anystreet Dr
Lafayette, LA. 705

As requested, this is a Flood Insurance Rate Map Determination on the **primary structure** located at the above address as located on the Parish Flood Insurance Rate Map (FIRM). Please note this is not an elevation status of the specific structure. To obtain the elevation status of your particular address you must get a FEMA Elevation Certificate from a licensed land surveyor. The following information is provided:

Community Number: **220105** FIRM Panel Date: **12/21/2018** Panel Number: **22055C0170** Suffix: **J**
FIRM Zone: **AE – Special Flood Hazard Area** Base Flood Elevation: **30.2, NAVD88**

Federal law requires that a flood insurance policy be obtained as a condition of a federally backed mortgage or loan that is secured by the building. Lafayette Parish is a participant in the National Flood Insurance Program (NFIP) so flood insurance is available to all constituents.

NOTE: This determination is based on the Flood Insurance Rate Map for the City/Parish of Lafayette. This letter does **not** imply the referenced property will or will not be free from flooding or damage. A property not in a Special Flood Hazard Area may be damaged by a flood greater than that predicted on the FIRM or from a local drainage problem not shown on the map. This letter does not create liability on the part of the Lafayette Consolidated Government or any officer or employee therefore, for any damage that results from reliance on this determination.

This flood zone classification is based on the latest FIRM available and is subject to reclassification if, and when a new FIRM or new data becomes available.

N/A _____ This property is located within a Regulatory Floodway (Floodway Requirements apply)

N/A _____ A determination of the buildings exact location cannot be made on the FIRM. A copy of the FIRM is attached for your information.

Stephanie Weeks, CFM
Floodplain Administrator

Customer

COMMENTS: “This structure was newly mapped from Zone X-FIRM Panel 22055C0065G dated 01/19/1996, Community 220105. This structure was built in compliance with Zone X, according to FIRM Panel 2201010090B dated 08/01/1980, Community 220101.”

NOTE: Whether you are in a high-risk zone or not, you may need flood insurance because most homeowners insurance doesn't cover flood damage. If you live in an area with low or moderate flood risk, you are 5 times more likely to experience flood than a fire in your home over the next 30 years. For many, a National Flood Insurance Program's flood insurance policy could cost less than \$500 per year.
